

Practice Lab:

DSE Scala REPL to Scala Program

- This Practice Lab is dependent on Discussion Unit 7548, where most of the objects we create in this lab were introduced.
- In this Practice Lab, we migrate a number of [your] DSE Spark Scala statements (runnable in the Scala REPL, created in Practice Lab 7545), to a true Scala/Spark program.

Challenge 1: Prerequisites

Prerequisites:

- Instructions are provided for Linux
- We will operate below recommended settings; 1 OS node only, minimum 8 GB RAM, 12 GB RAM preferred
- That you have an operating single node DSE Core cluster with DSE Analytics enabled.
- All work done as 'root'

Challenge 1: Prerequisites

- Confirm or install the Scala compiler, as outlined in Discussion Unit 7548.
- Confirm or install the Maven utility, as outlined in Discussion Unit 7548.

Challenge 1: Scala REPL to Scala Program

- `cd /opt` (cd anywhere)
- `mvn archetype:generate \`
 `-DgroupId=com.datastax.enablement.bootcamp \`
 `-DartifactId=my-app \`
 `-Dversion=1.0 \`
 `-DinteractiveMode=false \`
 `-DarchetypeArtifactId=scala-archetype-simple \`
 `-DarchetypeGroupId=org.scala-tools.archetypes \`
 `-DremoteRepositories=http://scala-tools.org/repo-releases`
- `cd my-app`
 `rm -r ./src/test/scala/samples/*`

Generated tests: Will error on compile unless corrected

Challenge 1: Scala REPL to Scala Program

```
~/plugins/  
<finalName>MavenEnterpriseApp-ear</finalName>  
</build>  
<dependencies>  
  <dependency>  
    <groupId>com.mycompany</groupId>  
    <artifactId>MavenEnterpriseApp-ejb</artifactId>  
    <version>1.0-SNAPSHOT</version>  
    <type>ejb</type>  
  </dependency>  
  <dependency>  
    <groupId>com.mycompany</groupId>  
    <artifactId>MavenEnterpriseApp-web</artifactId>  
    <version>1.0-SNAPSHOT</version>  
    <type>war</type>  
  </dependency>  
</dependencies>  
</project>
```

- Copy in (replace) with a correct pom.xml
- Copy in a final, or stub App.scala
- Both above supplied by the instructor

Challenge 1: You are done when-

- Your Scala program compiles and runs, loads data from CSV into DSE
- mvn package
- dse spark-submit --class \ com.datastax.enablement.bootcamp.App \ target/my-app-1.0.jar
