

Practice Lab:

DSE Analytics, Spark/SQL

- This Practice Lab is dependent on Discussion Unit 7578/7579, and others, where most of the objects we create in this lab were introduced.
- In this Practice Lab, we use another REPL; Spark/SQL is available from "dse spark-sql"
- Because Scala is too hard ?!

Challenge 1: Prerequisites

Prerequisites:

- Instructions are provided for Linux
- We will operate below recommended settings; 1 OS node only, minimum 8 GB RAM, 12 GB RAM preferred
- That you have an operating single node DSE Core cluster with DSE Analytics enabled.
- All work done as 'root'

Challenge 1: Spark SQL REPL

From the command line:

- (Exist all other REPL shells)
- `dse spark-sql`

```
select * from ks_7579.customer;
```

```
exit;
```

- Run more from prior Spark/SQL Practice Labs.

Working Goal:

From: Maury_Atwater
To: DSE_HOTSHOT

Subject: Need this now !!!

Big deal. I don't know what you've been doing ! ☹

Take my SQL/DML file with (n) statements, run those using the Spark/SQL REPL. Changes may be required to the DML.

-MA

Maury Atwater, President
of Atwater's

Challenge 2 (Optional): Port Maury's SQL/DML

- Take the supplied SQL/DML file and run using the spark/SQL REPL. (And/or these commands are on the Notes page.)
- Get each to run. changes may be required.

Practice Lab:

Lessons Learned
