

Practice Lab:

DSE Analytics, Streaming

- This Practice Lab is dependent on Discussion Unit 7612, where most of the objects we create in this lab were introduced.
- This Practice Lab is also dependent on Practice Lab 7548/7549, where we generated/used the ability to compile Spark/Scala programs.
- This Practice Lab requires a working DSE system, with DSE Analytics enabled.
- Because of the streaming nature, this work should be compiled using Maven or an IDE.
- A second terminal window is required to run `"nc -lk 9999"`.

Challenge 1: Prerequisites

Prerequisites:

- Instructions are provided for Linux
- We will operate below recommended settings; 1 OS node only, minimum 8 GB RAM, 12 GB RAM preferred
- That you have an operating single node DSE Analytics cluster.
- All work done as 'root'

Working Goal:

From: Maury_Atwater

To: DSE_HOTSHOT

Subject: Need this now !!!

I need to know we can stream.

Complete the following:

- . Compile and run the streaming word count example; Example 01.

-MA

Maury Atwater, President
of Atwater's

Challenge 1: Compile and Run Example 01

- Compile and run the word count, streaming example 01 from Discussion Unit 7612.
- Paste into App.scala from 7458/7459. Compile and run as described there.
- You'll need a second terminal running "mc -lk 9999", and type text in there when ready
