

Practice Lab:

DSE Search, Scalars,
docValues,
KeywordTokenizer

- This Practice Lab is dependent on Discussion Module 7447, where most of the objects we create in this lab were introduced.
- This Practice Lab requires a working DSE system, with DSE Search enabled, and with ability to execute CQL DDL.
- No command line prompt is required.
- All commands are run from CQLSH, or DSE Studio.

Challenge 1: AND(ed) String and Integer

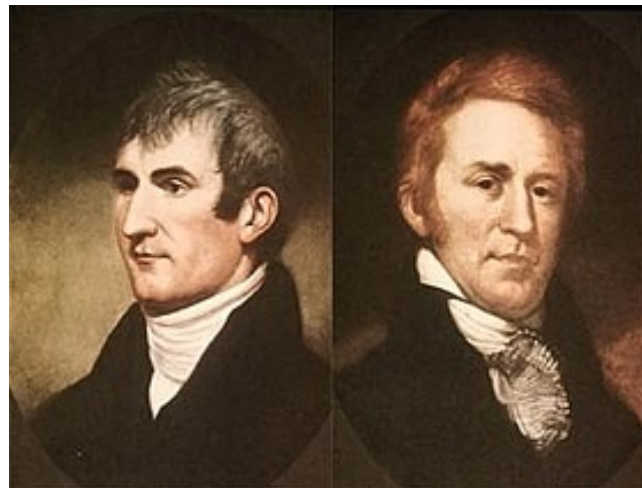

- Create the runtime environment to support an AND(ed) query, using a StrField and an Integer
- Sample CQL DDL/DML commands on notes page below-

Challenge 2: Lowercase (TextField) with Sort

- Create the runtime environment to support a lowercase TextField query, and output results in a sorted manner
- Sample CQL DDL commands on previous notes page-

Go Farther: (Optional)

The Lewis and Clark Expedition from May 1804 to September 1806, also known as the Corps of Discovery Expedition, was the first American expedition to cross what is now the western portion of the United States.

Challenge 3 (Optional): multiValued, tags

Create the runtime environment and query to support-

- A multiValued field
- Add data, similar to attribute tags on a product row
- Write the query to find a subset of rows
- Sample CQL DDL/DML commands on notes page below-
